

IDN – Inference Distribution Network Architecture and Technologies

Host: Shengnan YUE (China Mobile)
Tianji JIANG (CMCC)

Note Well

By participating in the IETF you agree to follow IETF processes and policies. This Note Well is a reminder of some of those policies. For a linked version of this text, please visit www.ietf.org/note-well or use the QR code below.

- IETF participants are expected to behave in a professional manner and extend respect and courtesy to their colleagues at all times (see *RFC 7154: IETF Guidelines for Conduct and IETF Anti-Harassment Policy*). If you have any concerns about behavior, please contact the *Ombudsteam* who have a duty of confidentiality and extensive powers to act, as set out in *RFC 7776: IETF Anti-Harassment Procedures*.
- If you are aware that any IETF contribution (as defined in *RFC 5378: Rights Contributors Provide to the IETF Trust*) is covered by patents or patent applications that are owned or controlled by you, your employer or your sponsor, you must disclose that fact, or not participate in the discussion (see *RFC 8179: Intellectual Property Rights in IETF Technology*).
- For detailed process information consult *RFC 2026: Internet Standards Process* and *RFC 2418: IETF Working Group Guidelines and Procedures* and updates to those.
- The IETF routinely makes public written, audio, video, and photographic records of IETF activities, including your personal information as set out in the *IETF Privacy Statement*.

For advice, please talk to Working Group chairs or Area Directors.

Motivation

- Two Steps of AI: training and inference
 - Training: building models
 - Inference: applying models to emerge value in real world
- "**Inference Distribution Network**" is dedicated to discuss:
 - Distributed AI inference scenarios (*e.g. deploying openclaw on edge gateway for smart home*)
 - Carrier WAN network infrastructure (*e.g. AI Grid, AI WAN*)
 - Inference jobs and traffic scheduling mechanisms
 - Open discussion: Technical gaps and potential standardization opportunities

Agenda

Start	End	Time (mins)	Toptic	Speaker	Company
17:00	17:05	5	Host	Shengnan YUE <i>Tianji JIANG</i>	China Mobile
17:05	17:15	10	<i>IDN Architecture and requirements</i>	<i>Jian SONG</i>	China Mobile
17:15	17:25	10	<i>Carrier network for AI Inference</i>	<i>Luis Contreras</i>	Telefonica
17:25	17:35	10	<i>AI WAN Key Technologies for Distributed Inference</i>	<i>Ka Zhang</i>	Huawei
17:35	17:45	10	<i>Inter-Datacenter Load Balancing for AI Inference</i>	<i>Yuan Li</i>	Beijing University of Posts and Telecommunicati ons
17:45	18:00	15	Open Discussion	All	

Open Discussion – IETF Role in AI Inference

1. From an operator's perspective, what are the most critical network requirements for supporting AI Inference?
2. How can carrier IP infrastructure play a practical role in supporting AI inference?
3. What should IETF prioritize in standardizing network support for AI inference (*not just agent*), and do existing working groups (eg: rtgwg, cdni) sufficiently address these needs,– or would a more focused effort be beneficial?

History, current, and future

Background

- IETF123: [HotRFC presentation “DIN”, Side meeting “DIN & IOA”](#)
- IETF124: [rtgwg presentation “DIN usecases-requirements”](#)
- IETF125: [Side meeting “AI Inference Distribution Network”](#)

Current

- IETF126: [Side meeting “IDN - Inference Distribution Network Architecture and Technologies”](#)

Future

-

Thank you for your attention!
